

Sepertinya kita punya push baru dari azis. coba clone duulu  
[https://github.com/totemocreativestudio/ai\\_affiliate.git](https://github.com/totemocreativestudio/ai_affiliate.git)

Kalau semuanya udah di clone.

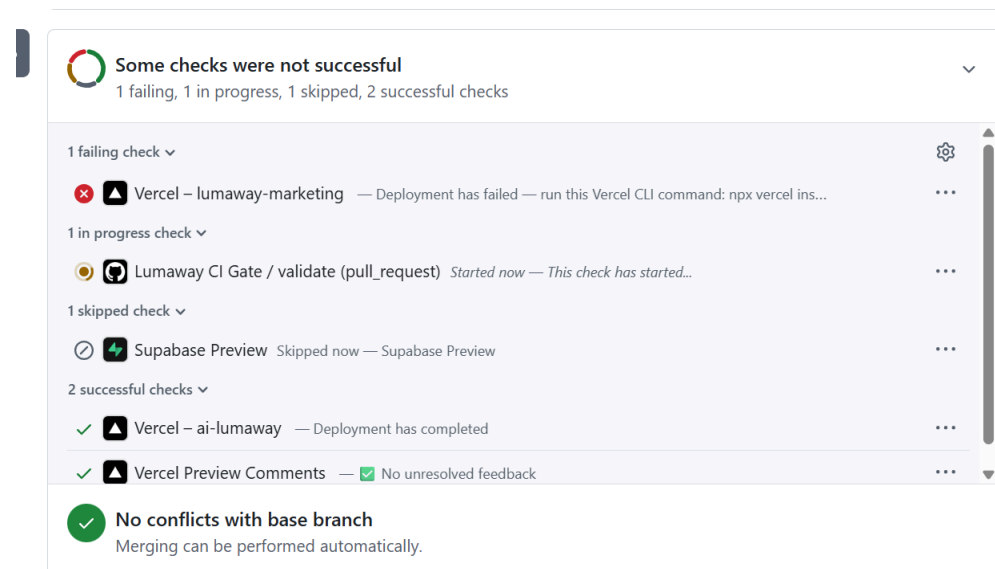

Rapihin semua issue yang memungkinkan.

dan kalau udah sesuai. langsung kerjakan sampe beres. yang penting fungsinya semua beres dan juga tampilan UI nya udah bagus gampang di mengerti user.

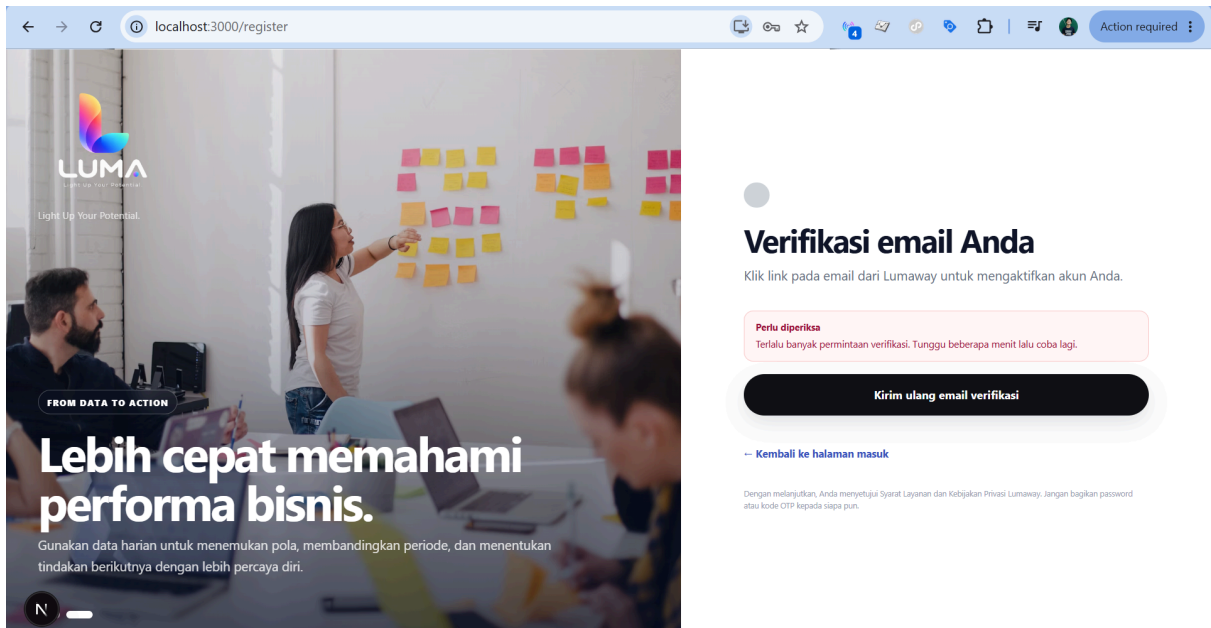

untuk logicnya terserah kamu dulu aja.

kalau udah selesai langsung push

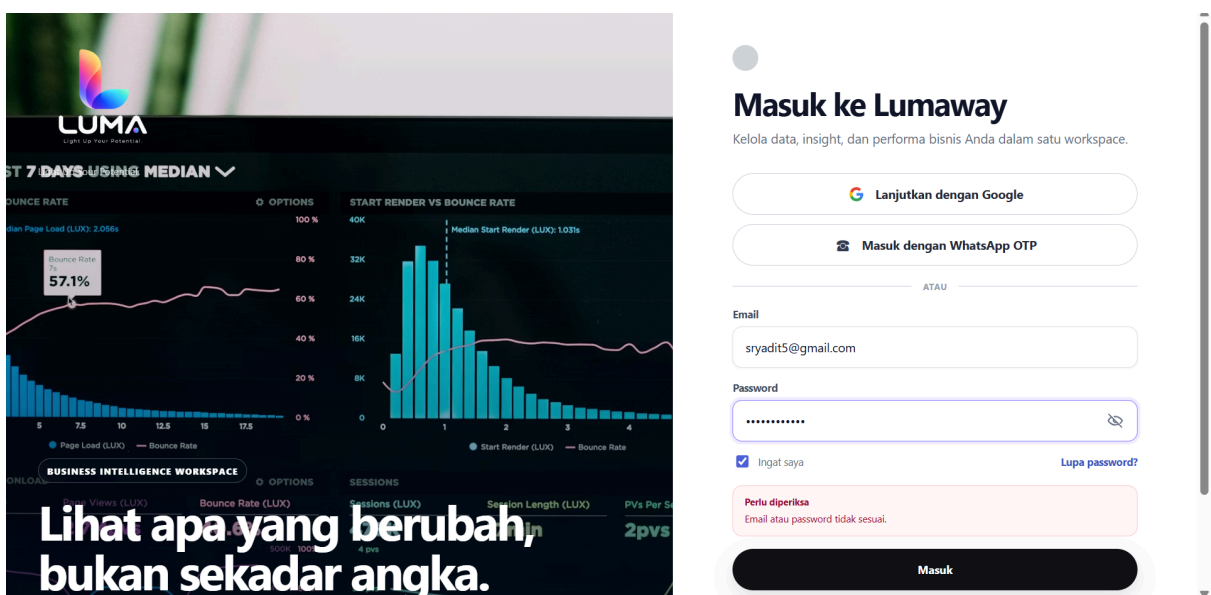

ini kenapa???

Bro, waktu gua tes buat jalanin di lokal. ini mentok. gak bisa gua masuk menu login atau daftar. pantes aja gua ga bisa bikin akun

Masa di testing hasilnya gini? kalau masih di localhost, jangan dulu lah di batasi

Ini masih kaya gini loh. padahal udah bener tadi password sama emailnya...

Oke di lokal sudah bisa. push sekarang..

Perbaiki semua. install playwright harus sampai bisa download.

Kerjakan semua.

Ini ada issue baru :

## Error Type

Console Error

## Error Message

A tree hydrated but some attributes of the server rendered HTML didn't match the client properties. This won't be patched up. This can happen if a SSR-ed Client Component used:

- A server/client branch `if (typeof window !== 'undefined')`.
- Variable input such as `Date.now()` or `Math.random()` which changes each time it's called.
- Date formatting in a user's locale which doesn't match the server.
- External changing data without sending a snapshot of it along with the HTML.
- Invalid HTML tag nesting.

It can also happen if the client has a browser extension installed which messes with the HTML before React loaded.

Next.js version: 16.3.4 (Turbopack)

Setelah selesai perbaikan ini ::

Foto lembar invoice/faktur tagihan dari pemasok Gempur Joe Wijaya yang ada di kantor Jakarta.

Isinya biasanya ada nomor invoice, tanggal, rincian barang, harga, dan total tagihan. Foto seluruh halamannya sampai terbaca jelas.

Yang dicari tagihan untuk empat PO September tadi. Dokumen PO dan surat jalan sudah kita punya.

Follow up via wa ketik dan ada nomor

Kalo klik tambah listing add card form isi di product & commerce

Menu pilihan

Jngn pake kode kalau hapus cukup konfirmasi oke aja

Kalau hapus data

Filtering data dari tgl di sesuaikan  
Pilihannya mana tinggal klik delete

Di semua fitur

Rapihin table di affiliate soalnya kemarin ada yang harusnya di isi angka, isinya malah text. begitupun sebaliknya. dan semuanya yang tidak sinkron dengan logic yang seharusnya

ini masih error :

Next.js version: 16.3.4 (Turbopack)

Masalah Baru :

Fitur login perlu di perbaiki, UI UX perlu di perbaiki juga, karena masih sangat susah di pahami, dan harus ada perbedaan dari sebelumnya.

Setelah selesai ini Push dan Deploy

Ekspektasi saya :

Fitur login sudah selesai, orang bisa daftar dan masuk, dan juga ada di database.

UI UX sudah rapih dan sangat mudah di pahami walaupun bukan orang bagian divisi tersebut yang menggunakan system ini.

Semua fitur sudah aktif dan sudah bisa di gunakan.

Masalah baru :

Kenapa pada saat deploy, terjadi error.

ekspektasi :

Harus di perbaiki sampai bisa. jangan error

masalah baru :
